# Food Processing Product Solution Guide for Wiring Devices

# HUBBELL® Food Processing Solutions

## Washdown Areas

To ensure sanitary conditions, washdowns are required in food processing

environments. Strict cleanliness and sanitation requirements must be met to ensure product is safe for consumer use, but washdowns and harsh chemicals can damage and shorten the life of electrical products. Selecting the proper equipment is critical in avoiding downtime while still promoting sanitary conditions. All electrical equipment, controls, and components must be environmentally rated for the correct application.

## Corrosive Environments

In highly corrosive food processing environments, materials must

constantly battle deterioration. Unprotected electrical products can deteriorate and fail, creating safety issues, unreliable connections, and the potential for lost productivity. Corrosion caused by chemicals, moisture, and other elements can't be eliminated, but the right products can ensure that corrosion doesn't interfere with reliable power delivery.

## Extreme Temperatures

Food and beverage plants often operate within extreme temperature ranges

due to processing equipment like dryers, ovens, and flash freezers. Harsh hot and cold zones, along with extreme temperature fluctuations, can add stress to the electrical system. In these environments, electrical component failure may occur. Expansion and contraction caused by temperature changes can damage electrical devices.

## Process Automation

Improving food processing capabilities and efficiencies can

help lower production costs while improving overall productivity. To achieve this, all electrical, instrumentation and automation components must work together efficiently and effectively within the process automation. Automating food and beverage processing requires equipment flexibility and the ability to reconfigure quickly and efficiently.

## Personnel Protection

Not only is food safety important in a food processing environment – so is

the safety of the personnel who work in these areas. Employees are subject to the risk of electrical shock from exposed wiring and trips and falls from cables and cords on the floor. Injury due to working alongside harsh chemicals and in extreme temperatures are also a concern. Commitment to personnel safety requires the right types of electrical components to protect against hazards.

## Harsh Locations

Food processing plants can be classified as hazardous by

the National Electrical Code because of the way materials are handled, processed, and stored. Explosion and fire are possible due to the presence of flammable gases, vapors, and dust. To protect food processing facilities and employees, high-performance solutions are needed to prevent and contain possible explosion.

# Washdown Areas

Washdown environments can be challenging to clean. Not only do electrical products need to withstand high-pressure washdowns and harsh chemicals, but complete runoff is also important. Whether it's Watertight devices, Watertight Safety-Shroud® Twist-Lock® devices or IEC Pin & Sleeve devices, Hubbell's extensive offering of devices meet the challenge.

## IEC Watertight and Switch-Rated Pin & Sleeve Devices

- The UV-stabilized, impact and corrosion-resistant PBT housing is designed to withstand harsh industrial environments
- Advantage™ Series Switch-Rated Pin & Sleeve has superior water ingress protection, UL witnessed IP69k and UL Type 4X and 12. Device is built to withstand wet and harsh environments
- The sleek and modern design of the ergonomic device is easy to keep clean making it ideal for hygienic food processing facilities

### Water & Dust Ingress Protection:

#### IP69k Water Test

Extremely Hot (176°) and High Pressure Water (1450 psi) sprayed from various angles.

#### IP69k Dust Test

Device is placed in a dust chamber for 8 hours while a vacuum tries to pull dust into the sealed device.

#### UL 50E Type 4X Test

High Flow of Water (65 gallons of water per minute thru 1" hose) is directed at all joints of the enclosure for 5 minutes.

#### Advantage™ Series

Closure cover is spring-loaded to the open position, reminding users that the cover must be secured to ensure maximum ingress protection.

## Watertight Safety-Shroud® Twist-Lock® Devices

- Constructed of highly impact-resistant PBT thermoplastic for a UL Type 4X rating in heavy duty environments
- Safety-Shroud virtually eliminates bent and broken plug blades, leading to longer equipment life while providing extra protection for personnel

# Corrosive Environments

Food processing areas can be particularly corrosive for electrical connections, calling for an extra level of safety and protection. Hubbell offers a wide range of plugs, connectors, and receptacles that are specifically designed to withstand corrosive environments.

## Weather Resistant Receptacles

Per National Electrical Code (NEC®) Article 406.9; all 125 and 250 volt, 15 and 20 amp non-locking receptacles for use in damp or wet locations shall be a listed weather resistant type. Listed devices are required to have a WR marking on the face visible when installed.

## NEC® 110.11 Electrical Installations

Unless identified for use in the operating environment, no conductors or equipment shall be located in damp or wet locations.

## Corrosion Resistant Devices

- UV stabilized, chemical and oil resistant receptacle faces are impact resistant in refrigerated environments
- Nickel plated contacts and stainless steel hardware protect metallic components from corrosion
- Powerful nylon cord grips on plugs and connectors prevent wire strain on terminals and prevent cord pull-outs

# Extreme Temperatures

Extreme temperature changes can wreak havoc on electrical components and devices that aren't constructed to withstand a food processing environment. Hubbell products are designed to withstand temperature fluctuations and accommodate expansion and contraction when necessary.

## H-MOSS®|MAXX™ Harsh Sensors

- Watertight occupancy sensor is ideal for energy savings in harsh environments
- Line and low voltage options are available
- Watertight OPTIMYZER is IP66, NEMA 3R watertight and outdoor rated

Outdoor Rated Watertight Wall Mount PIR Sensor		IP66, NEMA 4X
Description	Voltage	Catalog Number
Heavy duty wall or pendant mount PIR sensor; -40°F to 149°F (-40°C to 65°C) operating temperature range; isolated relay, photocell and 160° of coverage	24V DC	<b>AHP1600WRP*</b>

# Process Automation

## NEC® 430.102 (B)

(1) Separate Motor Disconnect. A disconnecting means for the motor shall be located in sight from the motor location and the driven machinery locations.

(2) Controller Disconnect. The controller disconnecting means required in accordance with 430.102(1) shall be permitted to serve as the disconnecting means for the motor if it is in sight from the motor location and the driven machinery location.

Hubbell's complete line of electrical components and devices includes cost-effective alternatives to conventional wiring methods, along with fast installation and excellent performance. It also allows for easy retrofits to existing hard-wired installations.

## Linkosity®

- Reconfigurable factory defined assemblies that can be easily installed as a cost effective alternative to conventional wiring methods, supports moves, adds and changes
- Enables fast installation and high technical performance for 20A and 30A circuits up to 600V

### NFPA 79 Section 16.1.1(6) 16.1.2 Control Panel Utility Receptacle Standard

- All utility receptacles must be GFCI protected.
- All external utility receptacles must be covered.
- All covers must maintain the enclosure rating.

### NFPA 70E:

- Electrical equipment enclosure scan ONLY be accessed by qualified personnel with extensive protective clothing and equipment, including fire-resistant suits and hoods with non-conductive wands.

# Personnel Protection

The combination of GFCI protection and tamper-resistant safety provides an ideal one-stop solution. Hubbell's tamper-resistant GFCI devices also include a weather-resistant rating per NEC 406.9, providing UV and corrosion resistance.

For non-residential installations all 125V 15 and 20 AMP receptacles installed in locations specified in NEC® Article 210.8(B)(1) to (8) shall have ground fault circuit interrupter protection for personnel. These areas include:

- (1) Bathrooms
- (2) Kitchens
- (3) Roof Tops
- (4) Outdoors
- (5) Sinks (within 6' of edge)
- (6) Indoor Wet Locations
- (7) Locker Rooms / Shower Facilities
- (8) Garages / Service Bays

## GFCI Receptacles

- Self-Test units continually tests and monitors for protection automatically
- No power at device face if reverse wired, eliminating false assumption of protection
- Patented tamper-resistant design limits improper access to energized contacts

### AUTOGUARD® Self Test GFCI Receptacles

Description	Color	15A 125V	20A 125V
Flush, polyester face; back and side wired; multiple drive screws; 10 kA Short Circuit Current Rating	Black Brown Gray Ivory Red White	<b>GFR5262SGBK</b> <b>GFR5262SG</b> <b>GFR5262SGGY</b> <b>GFR5262SGI</b> <b>GFR5262SGR</b> <b>GFR5262SGW</b>	<b>GFR5362SGBK</b> <b>GFR5362SG</b> <b>GFR5362SGGY</b> <b>GFR5362SGI</b> <b>GFR5362SGR</b> <b>GFR5362SGW</b>

## Locking Switches

- Prevents unauthorized control of lighting or ventilation control
- Keys supplied with each locking switch
- One piece integral grounding terminal provides a low resistance ground path

### AC Barrel Key

20A 120-277 Volt

Pole	20A

Replacement key	<b>HBL1209</b>	

## Circuit Guard® Portable GFCI

- Provides a watertight housing for maximum safety in harsh environments
- Available with either automatic and manual set feature to fit the application
- Bright indicator light provides fault confirmation from a distance

### Portable GFCI Line Cords

Description	Length	Industrial Grade		Commercial Grade Single		Commercial Grade Triple Tap	
		Automatic	Manual	Automatic	Manual	Automatic	Manual

Disconnect Switch	<b>FDS30*</b>	<b>FDS60*</b>
Auxiliary contacts, normally open, A600 pilot duty	<b>ACFSNO</b>	
Auxiliary contacts, normally closed, A600 pilot duty	<b>ACFSNC</b>	

\*Class "J" fuses not included.

30A Units supplied with (2) 1 in. N.P.T. raintight conduit fittings.

60A Units supplied with (2) 1 1/4 in. N.P.T. raintight conduit fittings.

## TrukTrak® and TredTrak®

- Safeguards cables, hoses and cords from vehicle and pedestrian traffic
- TrukTrak® is ideal for industrial environments where trucks and forklifts are present
- TredTrak® supports pedestrian and light vehicle traffic

### TrukTrak® and TredTrak® Systems

## Industrial Cord Reels and Hose and Air Reels

- Keeps cords and hoses organized and off the floor, saves time and money and improves safety while extending product life
- Provide safe convenient power and lighting for demanding industrial applications and environments
- Powder coated steel construction can be ceiling, wall or bench mounted

### UL355 4.3, 4.4

Cord Reels, that employ Ground-Fault Circuit Interrupter outlet(s) and are connected to the power supply by means of flexible cord with an attachment plug and/or that employ slip rings, shall be provided with open neutral protection as part of the GFCI.

### NEC® 110.26(E)(2)

Outdoor. Outdoor electrical equipment shall be installed in suitable enclosures and shall be protected from accidental contact by unauthorized personnel, or by vehicular traffic.

# Harsh Locations

Hubbell's unfused disconnect and mechanical interlock switches are ideal for applications containing flammable gases or vapors and ignitable dusts or fibers. Hubbell devices are also suitable for use in outdoor or indoor damp, wet, and dirty locations, or in areas where frequent wash downs, heavy rain, or water-spray routinely occurs.

**NFPA 33 Standard for Spraying Applications Using Flammable or Combustible Materials** covers spray application of flammable or combustible materials by a variety of methods. Contains requirements for the maintenance of safe conditions as well as personal safety.

**NFPA 34 Standard for Dipping, Coating and Printing Processes Using Flammable or Combustible Liquids** covers fire and explosive hazards. Includes water-borne and water reducible materials.

## Hazardous Location Non-Fused UL1686 Mechanical Interlocks

- Plug and switch are interlocked for superior safety
- UL1686 C1 listed and fully interchangeable with other UL1686 C1 devices
- Compact size and footprint for easy placement
- NEMA 4X with receptacle lid turned shut or with plug locking ring tightened

Description	Circuit	Receptacle	Plug
30 AMP 600V AC	2W 3P	<b>HBLVSQ3023</b>	<b>HBLVP3385</b>
	3W 4P	<b>HBLVSQ3034</b>	<b>HBLVP3485</b>
60 AMP 600V AC	2W 3P	<b>HBLVSQ6023</b>	<b>HBLVP6385</b>
	3W 4P	<b>HBLVSQ6034</b>	<b>HBLVP6485</b>

*Notes: HBLVSQ 30 Amp models come standard with 1" drilled and tapped conduit openings top and bottom plus two 1" x 3/4" reducers and one 3/4" close-up plug for maximum flexibility. 60 amp models come with one 1 1/2" opening on top and bottom and one 1 1/2" close-up plug.*

## Hazardous Location Non-Fused Disconnect Switches

- Compact size provides application flexibility and cost savings
- Fewer cover bolts reduces installation and maintenance time
- Removable ductile mounting feet adjust to irregular mounting surfaces
- UL 98 certified switch
  - Class I, Div. 1 & 2, Groups B,C,D
  - Class I, Zones 1 & 2, Groups IIB+ H2, IIA
  - Class II, Div. 1 & 2, Groups E,F,G
