## StreamLine<sup>®</sup> MODULAR SERIES

When you have a range of products that can be mixed and matched with each other offering a multitude of solutions... When you have a range of devices that can perform multiple functions... When you have devices that allow you to control more than one channel independently... When you have a range of bases that allow you to mount your devices in various manners... When you have all this, you have Federal Signal's new line of Streamline<sup>®</sup> Modular products... The first range of devices engineered to be Modular, Multifunctional, Multiple Input and Multivoltage. At Federal Signal we do not take challenges that are easily solvable... we do not take the ordinary for granted... and we make sure our daily mission is to deliver the best possible Total Solution to our customers. Welcome to a new opportunity of signaling options.

**Signal** A range of multifunctional signals based on an innovative multiple input technology allowing each function of the device to be controlled via independent electrical contact, creating different levels of alarm with one single device.

**Bases** Four different base shapes with two ranges of voltages 12-24VAC/DC, and 120-240VAC; a perfect fit for each application.

**Signals & Bases** can be matched together with a simple snap-on technology allowing an easy and safe installation procedure, even in the most challenging environments.

A B C G R

**Multifunctional LED Beacon with Steady/Flashing/Rotating Options SLM100** Multifunctional LED beacon with high optical performance. Developed with a multichannel technology, SLM100 allows three separate light effects (steady, flashing or rotating) controllable via independent electric contacts.

A B C G R

**Multifunctional Low Profile LED Beacon with Steady/Flashing/Strobe Options SLM300 and SLM350** Multifunctional LED beacon engineered to satisfy the most demanding applications. Developed with a multiple input technology, SLM300/SLM350 allows three different light effects (steady, flashing, strobe) controllable via independent electric contacts making this device the perfect choice for most applications.

Available with Proximity and Directional lenses, SLM300/SLM350 is the ideal where gaining attention is a must.

**Modular Electronic Sounder SLM700** Multifunctional electronic sounder developed with a multichannel technology that allows two separate levels of alarm (pre-alarm, alarm) controllable via independent electric contacts. SLM700 offers 64 different tones through two separate inputs, adjustable between 65 dB(A) and 105 dB(A).

A B C G R

**Modular Multifunctional LED Combination Audible/Visual Signal SLM500** Multifunctional LED beacon and sounder developed with a multiple input technology that allows three separate levels of alarm (alert, pre-alarm, alarm) controllable via independent electric contacts. SLM500 offers two light effects (steady or flashing) and 64 different tones (selectable via dip-switch) through two inputs, adjustable between 65 dB(A) and 105 dB(A).

**Modular LED Status Indicator SLM400/SLM450** Multicolor LED beacon engineered to satisfy the most demanding applications. Developed with a multiple input technology, SLM400/SLM450 allows three different colors (red, green, and amber) controllable via independent electric contacts making this device the perfect choice for most applications.

Available with Proximity and Directional lenses, SLM400/SLM450 offer two configurable integrated light patterns (steady or flashing).

STREAMLINE® MODULAR

## Bases

**SHALLOW** Base designed for flat surface mounting where cabling occurs from the bottom of the device and where a compact design is required.

---

**DEEP** Base designed for flat surface mounting. This base includes two M20 cord grips making this solution ideal for mounting these units in a series.

---

**TWIN** Base is designed for lateral/wall mounting. This multifunctional mount accommodates two StreamLine™ modules creating unique combinations between visual and acoustic devices.

---

**WALL** Base designed for lateral/wall mounting. This unit includes two M20 cord grips making this product suitable also when it's not possible to wire the base of the signaling device.

---

STREAMLINE® MODULAR

## Stainless Steel Protection Grids

Available 5 sizes as an optional accessory.
