A PART OF

UNISTRUT® DEFENDER™

Unistrut International is proud to introduce a new, corrosion-resistant product line called Unistrut Defender. Unistrut Defender is designed for harsh environments, providing a service life between Hot-Dip Galvanized and stainless steel systems. Independent testing shows that Unistrut Defender is **THREE** times more corrosion-resistant than Hot-Dip Galvanized products. In addition, Unistrut Defender avoids the use of costly stainless steel hardware. Unistrut Defender is a great choice for harsh and corrosive environments.

Get better performance with Unistrut Defender.

This brochure lists the Unistrut Defender parts, dimensions and applications currently in stock. Many other Unistrut parts can be made by request.

*Patent pending

CORROSION PROTECTION

Unistrut Defender was tested against Hot-Dip Galvanized products by an independent, accredited 3rd party lab for 3,000 hours of continuous salt spray exposure per ASTM B117. At the conclusion of the test, 5 of the 6 Unistrut Defender samples still had not reached the 5% red rust failure criteria! The results are outlined below, showing that Unistrut Defender survived over 3 times as long as Hot-Dip Galvanized.

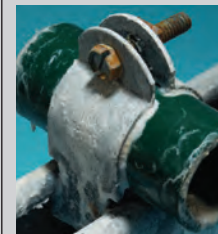

ASTM B117 TEST TO 5% RED RUST (RESULTS ARE IN HOURS):

	1	2	3	4	5	6	Average
Hot-Dip Galvanized per ASTM A123 and A153	744	744	1,207	-	-	-	898
Unistrut Defender	2,856	3,000*	3,000*	3,000*	3,000*	3,000*	2,976 <i>3X Improvement!</i>

*Test stopped at 3,000 hours with samples still not reaching failure.

PHOTOS FROM ASTM B117 SALT SPRAY TEST:

Hot-Dip Galvanized reached 5% red rust at an average of 898 hours.

	0 hrs	100 hrs	1,000 hrs	2,000 hrs	3,000 hrs
Hot-Dip Galvanized per ASTM A123 and A153					
Unistrut Defender					

5 of 6 samples still active at 3,000 hours!

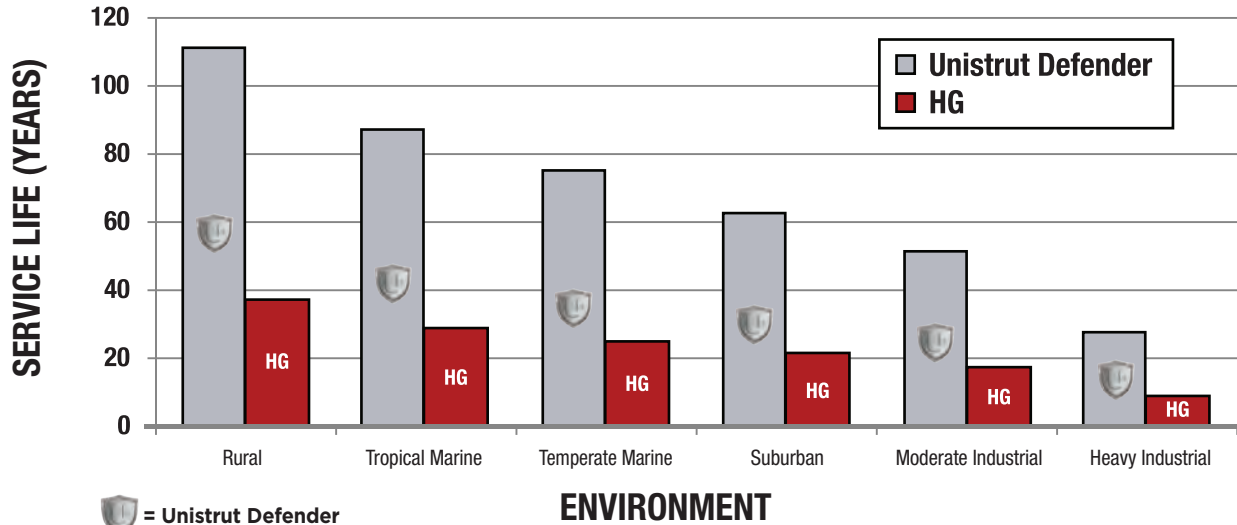

ANTICIPATED SERVICE LIFE

With over 3 times the corrosion protection of Hot-Dip Galvanized products, the anticipated service life for Unistrut Defender vastly outperforms traditional carbon steel framing systems. Unistrut Defender will meet the design life of most new applications, eliminating the need to replace parts over time. See the difference below!

ANTICIPATED SERVICE LIFE

(Time to 5% Red Rusting of the Steel Surface)

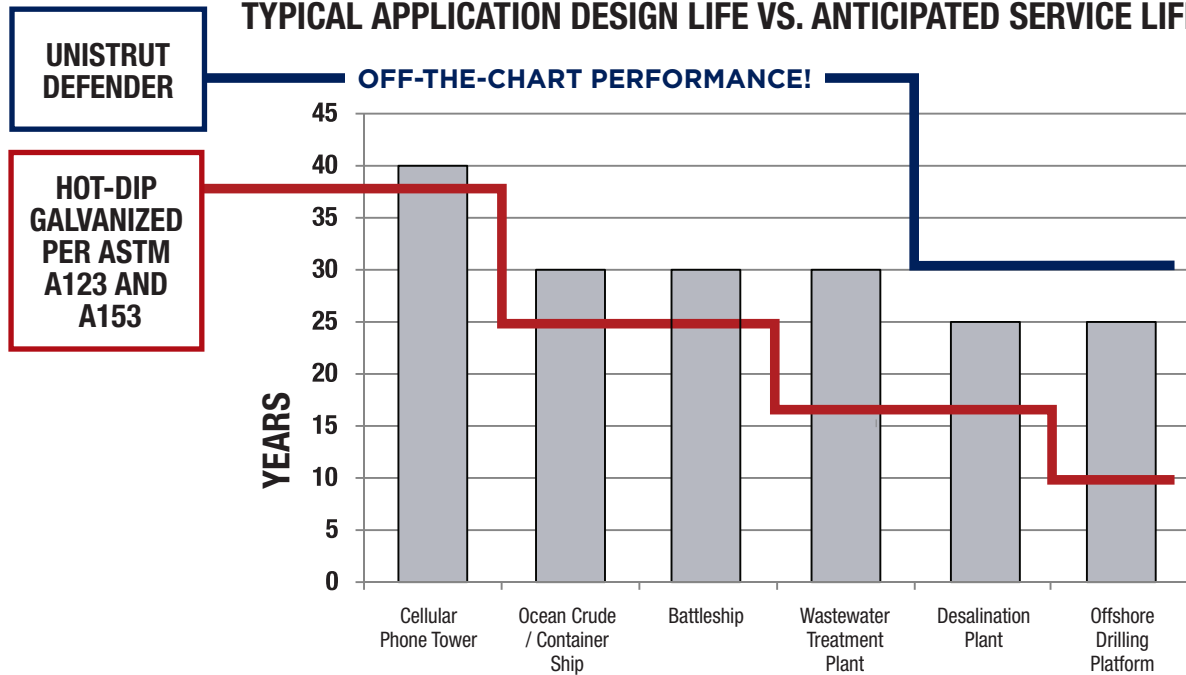

= Unistrut Defender

ENVIRONMENT

*HG = Hot-Dip Galvanized per ASTM A123 and A153 coating service life as specified within the Metal Framing Industry

TYPICAL APPLICATION DESIGN LIFE VS. ANTICIPATED SERVICE LIFE

UNISTRUT DEFENDER

HOT-DIP GALVANIZED PER ASTM A123 AND A153

OFF-THE-CHART PERFORMANCE!

YEARS

*Typical application design life is sourced from a number of different publications and is not true for all applications. Reference your project-specific requirements and environment for a true performance estimate.

TECHNICAL INFORMATION

FINISHES:

Unistrut Defender is a combination of two proprietary material coatings conforming to ASTM standards A1046 and A1059.

MATERIALS:

Channel, Fittings and Pipe Clamps meet the physical requirements of ASTM A1011 SS GR 33.

TECHNICAL NOTES:

1. Structural performance, including Slip and Pull-Out Loads, meets all Allowable Loads as specified in the Unistrut General Engineering catalog for carbon steels. Please reference the Unistrut General Engineering catalog for this information.
2. To achieve full performance and cost benefits, Unistrut Defender must be used as a complete metal framing system. In addition, Unistrut Defender should not be put in contact with stainless steel materials due to a dissimilar metals condition that will create galvanic corrosion.
3. Some red staining may be observed over time on Unistrut Defender parts in corrosive environments. Red staining is superficial oxidation of the zinc/iron ions at the surface, and not corrosion of the substrate steel. This is noted in ASTM A1059 section 6.3.
4. One of the unique characteristics of Unistrut Defender is that it contains self-healing properties. If the product is cut or scratched in the field, the finish will propagate into those areas eliminating the need for secondary touch-ups.

TABLE OF CONTENTS

1 5/8" Channel

DIMENSIONS

Imperial dimensions are illustrated in inches. Metric dimensions are shown in millimeters and rounded to one decimal place.

STANDARD LENGTHS

Standard lengths are 10 feet (3.05m) and 20 feet (6.10m). Tolerances are $\pm 1/8"$ (3 mm). Special lengths are available for a small cutting charge with a tolerance of $\pm 1/8"$ (3 mm).

P1000 DF (12 Gauge).....	6
P3300 DF (12 Gauge).....	7
P4100 DF (14 Gauge).....	8
P5000 DF (12 Gauge).....	9

Nuts & Hardware

THREADS

All threads on the nuts and bolts are Unified and American coarse screw threads.

DIMENSIONS

Imperial dimensions are illustrated in inches. Metric dimensions are shown in parentheses or as noted.

Unless noted, all metric dimensions are in millimeters and rounded to one decimal place.

Channel Nuts With Springs.....	10
Channel Nuts Without Springs.....	10
Hardware.....	10

General Fittings & Beam Clamps

APPLICATION

All parts drawings illustrate only one application of each fitting. In most cases many other applications are possible. The channels shown in the illustrations are P1000, 1 5/8" square, except where noted otherwise.

All 9/16" diameter holes use 1/2" x 15/16" hex head cap screws and 1/2" nuts – P1010, P4010 or P5510 – depending on the channel used. Nuts and bolts are not included with the fitting and must be ordered separately.

DIMENSIONS

Imperial dimensions are illustrated in inches. Metric dimensions are shown in parenthesis or as noted. Unless noted, all metric dimensions are in millimeters and rounded to one decimal place.

BEAM CLAMPS

Clamps are designed to be used with W, M, S and HP Shape beams, Standard C and Miscellaneous MC Channels, Angles and Structural Tees. Clamps must be used in pairs where indicated.

General Fittings	12
Beam Clamps	15

Pipe/Conduit Supports

APPLICATION

Unistrut pipe clamps are designed for the support of electrical and mechanical services. Supports to meet nearly every requirement can be attained using Unistrut Metal Framing components.

DIMENSIONS

Imperial dimensions are illustrated in inches. Metric dimensions are shown in parenthesis or as noted. Unless noted, all metric dimensions are in millimeters and rounded to one decimal place.
